

Cold Plasma Technology™

CPTH-12

ClimaTemp's "Patent Pending" Cold Plasma line of portable air conditioners are the first in the industry to utilize Bi-Polar Ionization Technology. This technology utilizes active purification by creating and releasing millions of positive and negative oxygen ions into the air. These ions seek out and attach to pathogens such as viruses, causing a chemical reaction on the surface of the cell membrane. This deactivates the viruses, rendering them harmless, so they can no longer spread or cause infection.

Although Cold Plasma Technology is revolutionary on its own, we went one step further by combining the 2 leading purification technologies of Cold Plasma Bi-Polar Ionization and HEPA filtration into a single portable unit. No other portable air conditioner utilizes both active purification and passive HEPA filtration, making it the most advanced IAQ purifying portable air conditioner ever.

**Cold Plasma
Technology**
with HEPA

- Kills - Viruses & Bacteria
- Kills - Covid -19 Surrogate Virus
- Kills - MRSA Virus
- Kills - Bird Flu (H5N1) Virus
- Kills - Swine Flu (H1N1) Virus
- Kills - Staph Bacteria
- Kills - E.coli
- Kills - C.dif
- Kills - T.B.
- Kills - Mold Spores
- Removes - Pet Odors
- Removes - Food Odors
- Removes - Cigarette & Cigar Odors
- Reduces - Allergens, Dust & Pollen
- Controls - Gases
- Controls - VOC's
- Neutralizes - Static Electricity
- Produces No Ozone
- No Chemicals added
- 100% Safe for people and environment
